ABOUT US

We are Engineering, Procurement and Construction Service Company.

DACOHILL Global Services Limited is an upscale multifaceted indigenous Oil and Gas Servicing company in Nigeria. As a best-in-class EPCIM (Engineering, Procurement, Construction, Installation and Maintenance) Company, we are well positioned to provide superior products and tailored bespoke support services in synergy with reputable OEMs across the Oil, Gas, Energy, Refineries, Manufacturing, Processing, Pharmaceuticals industries.

In pursuance of our corporate objectives, we have a robust synergy with world class International Organizations and Manufacturers with whom we share common business and developmental goals. We are committed to providing our clients with quality products, superior services, and making it easy to do business with us. Our far-reaching offering brings world-class products & brands to our clients, providing uncompromising quality, range and value for their industrial needs.

VISION STATEMENT

We aim to provide reliable and qualitative services to the Nigerian energy industry.

MISSION STATEMENT

To be Nigeria's best Engineering, Procurement and Construction Company in the energy sector. We will achieve this by:

- ⦿ *Leading the industry in HSE, performance and environmental stewardship*
- ⦿ *Developing a sustainable and diverse business*
- ⦿ *Attracting and retaining smart, flexible, and adaptable people*
- ⦿ *Adapting to changing markets and consistently delivering as sold to our customers*

PROJECTS EXECUTED

TESTING, PRESSURE TESTING INSPECTION AND CERTIFICATION:

DACOHILL offers pressure testing of pipelines, Vessels, Elbows, Hoses, Cargo Hoses, Pipelines, Pipe spools, Control Valves, Actuators, Oil Suction Hoses, Water Hoses, Skids, Pressure Vessel, Manifolds, Air compressors, etc.

Pipe spools and chambers either by using water (Hydro Testing) or by Air (Pneumatic Test). A Pressure test conducted to prove the integrity of pressure vessel with the use of liquid medium is known as Hydro test or hydrostatic test. The fluid used in the flushing or hydrostatic testing operation which is normally clean / fresh water or treated fluid. (Where applicable a suitable corrosion inhibitor, chloride controlled water, combination or mixture of such are used to prevent the possibility of damage due to the adverse effect of water on the pressure vessel material of its product service). Pressure Test carried out to prove the integrity of pressure vessel, nozzle, Chamber, reinforcement pads etc. with the use of dry compressed air or inert gas and water / soap solution is called Pneumatic Test.

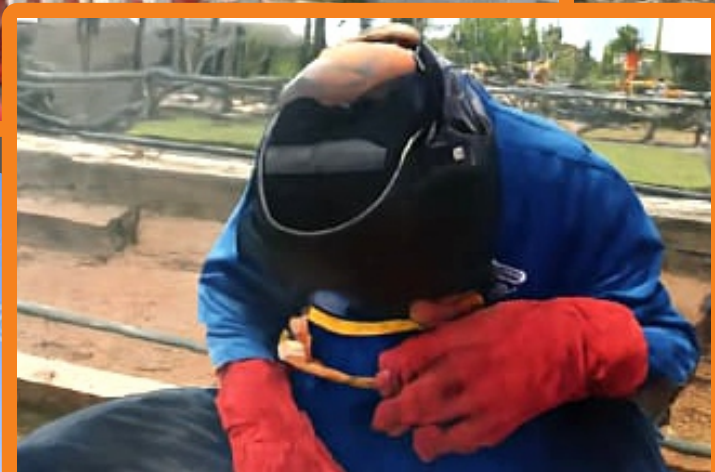

FIRE SAFETY CONSULTANCY

Often, professional advice is required to help with more complex fire safety issues which fall outside our client's normal management remit for fire safety. Our fire safety consultants can provide professional assistance on any fire safety issues, requirement or recommendations. Our approach is always tailored to match our client's organization's individual situation and set of circumstance.

We have an extensive network of fire safety specialist who have experience in different areas of fire safety, including piping, fittings replacements and maintenance. This allow us to make sure we match the situation with the person whose knowledge and experience best fits our client needs.

In additions, we always aim to balance commercial and economic needs with compliance, giving our clients Practical and cost- effective solutions.

CORROSION CONTROL & MANAGEMENT

With the knowledge of the adverse effect of corrosion on valves, hydrants or pipes, we use high tech for corrosion control and management procedures such as:

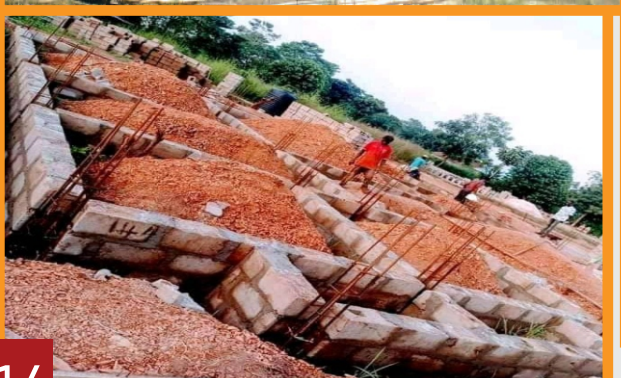

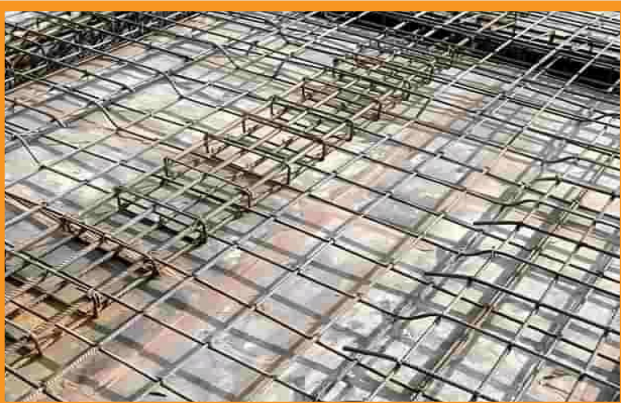

- Surface condition and metal selection
- Environmental modifications
- Protective coating
- Cathodic protection
- Planting
- Corrosion inhibitor

- Generators
- Excavators
- Dozzer
- Crew Bus
- Pick-up Vehicles
- Scaffold services

BLASTING & PAINTING SERVICES

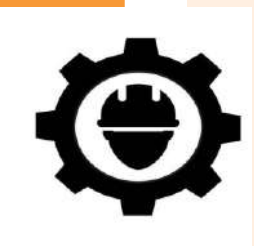

At Dacohill Global Services Limited, we provide various types of blasting and painting services to the Oil and Gas Industry, including UHP (ultra high pressure), hydro blasting and more traditional grit and steel ball blasting. We understand that surface preparation is essential for satisfactory performance of any paint system. The most expensive and advanced painting systems will fail if surface preparation is inadequate either in cleanliness or profile.

Our highly skilled blasters and painters are committed to provide the best solutions, best methods, best quality and best value in areas such as: Shipyards, LNG Plants, and Fabrication Facilities, Onshore and Offshore Projects and more. We also make use of our blasters and painters that are IRATA Certified Rope Access Technicians. This enables us to work in difficult to reach locations or repair work or where there are time constraints in completing a project. Rope Access is a means to complete your projects safely, on-time and within budget.

All our coating systems are applied in accordance with the respective paint manufacturers specifications. This process is closely monitored throughout the coating application.

Blasting and Painting Capabilities

- * Manual paint and brush application
- * (Air) Less paint techniques
- * Specialist coating applications
- * Manual dry grit blasting
- * Spot blast surface preparations
- * Automated dust free blasting with encapsulation
- * Manual hydro blasting UHP blasting
- * Mechanical preparation
